

The Atlas Copco logo, consisting of the brand name in a white serif font between two horizontal white bars, is positioned in the top left corner of the image.

Atlas Copco

A close-up photograph of a worker wearing black protective clothing and gloves, using a die grinder to work on a large, dark metal die. Bright orange sparks are being generated at the point of contact between the tool and the metal. The background is a blurred industrial setting with teal and blue tones. A semi-transparent blue graphic overlay is present in the bottom right corner, containing technical drawings and the product name.

# LSF39 Die Grinder

Power, Productivity and Ergonomics

# LSF39 Die G

## Packed with power

The new LSF39 series have been equipped with a state of the art motor which delivers a class leading performance with up to 1.8 kW. This will make the time on the job shorter and give a higher output.

## Ergonomic design

Ergonomics and user experience were the main focus for the new LSF39. The result is a rubberized grip and a trigger designed for long time use without discomfort. By combining low vibrations with a robust and long lasting product Atlas Copco continues to deliver the best value for the operator.

The unique LSF vibration dampening design allows the rotating spindle to flex under heavy load. Scatter dampening significantly extends the working life of rotary burrs and reduces cost of operation while also improving comfort and control.

Rubberized extension for a comfortable grip and high precision.

# rinder

## Innovation

Unrivaled performance for high productivity.

## Ergonomics

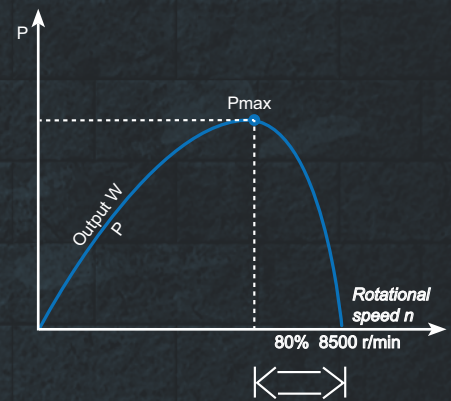

Very low vibration levels and low weight reduce the exposure and strain on the operator.

## Durability

A robust tool with low weight, designed for all day operation.

## Governor control

Maximum power for continued strong grinding with no loss of rotational speed is enabled by the speed governor. The result is a high removal rate and savings of valuable compressed air.

An ergonomic trigger that gives great comfort and control.

1.8kW motor. The high power minimizes the trigger time during grinding and sanding. A superior productivity that cuts costs on labour and abrasives, reducing the payback time dramatically.

Robust 3 bearing design

Governor controlled

## Accessories

### Adapter

UNC/W 5/8.

Cone wheel internal thread.

Ordering No. 4150 2292 90

### Rigid ring

Ring for rebuilding flexible extended die grinder to rigid die grinder. Two rings are needed.

Ordering No. 4150 2319 00

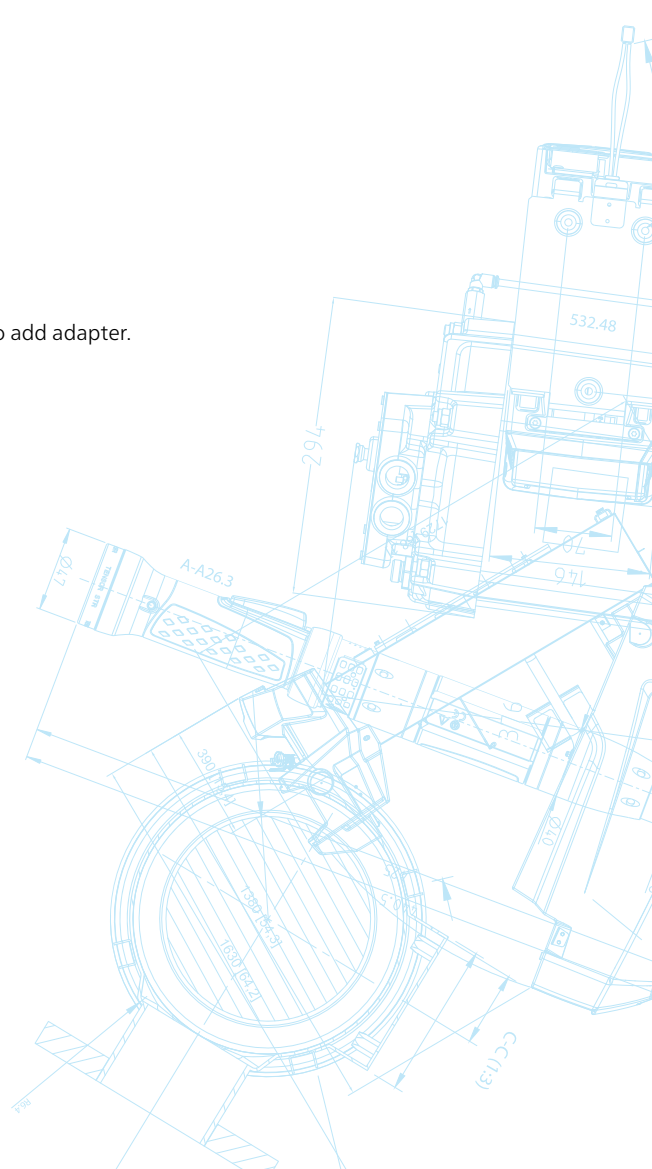

## Service kit

Ordering No. 4081 0581 03
